

## Highway - entrance mat

Highway is an efficient and extremely wet and moisture-absorbing entrance mat. The polyamide fibers of the carpet effectively scrape dirt off the footwear, dirt and moisture are not absorbed into the fiber. There is no white fiber in the pile of the carpet, thanks to which the dirt is not easily visible on the carpet. Highway keeps the interior of the property dry and clean and saves floor space. The washable Highway carpet is ideal as a corridor carpet for commercial and residential buildings thanks to its easy cleaning.

The carpet is surrounded by a border that reduces the risk of tripping. Thanks to the sturdy vinyl base, the rug stays in place. Highway is completely synthetic and it tolerates most cleaning chemicals and the carpet is easy to keep clean. Highway carpet is delivered in rolls and is available in 130cm width. The carpet is also delivered cut to size and bordered.
