

## COMBO 9 mm - heel proof entrance mat

Combo 9 mm is heavy duty primary entrance mat for all high and extreme traffic conditions including shopping centres, public buildings, block of flats, office buildings and schools. It is durable heel proof interlocking modular mat for both internal and external applications. Combo stops dirt, sand and debris in the entrance area before they enter the building.

The Combo 9mm entrance mat is intended for both indoor and outdoor use and is particularly suitable for entrances to hotels, restaurants, bars and other representative premises.

Recommended locations include shops, supermarkets, housing associations and commercial properties, as well as locations that require a particularly low-profile entrance mat.

The stylish curved pattern of the Combo 9mm entrance mat effectively scrapes even coarse dirt off the soles of shoes and prevents dirt from transferring to the interior.

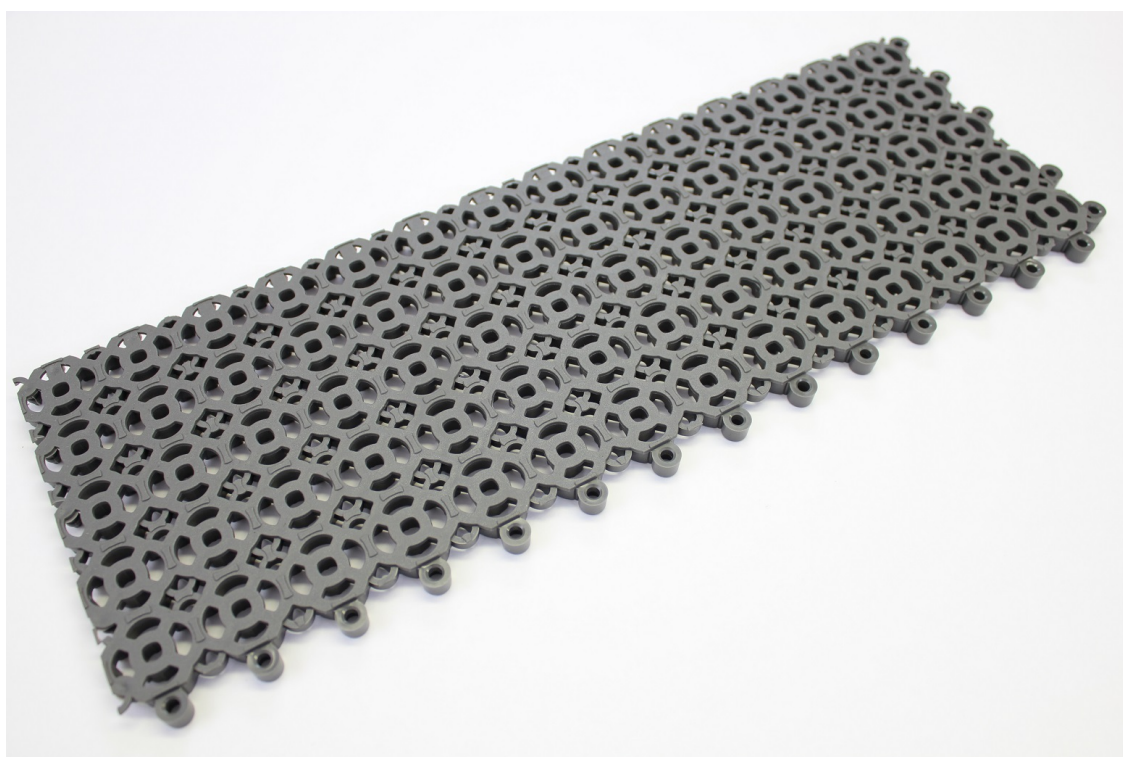

## COMBO 9 mm - heel proof entrance mat

### Interlocking modular tiles

Combo interlocking tiles can be installed in minutes without the use of specialised equipment. The modular tiles allow for the creation of a matwell without the complication or cost of having to cut a matwell into the floor.

### Easy maintenance

The Combo entrance matting is simple to maintain by regular vacuuming and hosing (regular hose or power washer). The Combo collection is simple to roll up for cleaning purposes. Any dirt that falls through the mat can be vacuumed or hosed once the matting has been removed.

SPECIFICATIONS:	
Material:	UV-resistant vinyl/NBR. Resist most chemicals and oils. 100 % recyclable.
Tile size:	400 x 140 mm
Packaging:	36 tiles / pkg (= 2 m <sup>2</sup> )
