

Safety playground rubber tiles

The safety playground rubber tiles are a special mat that absorbs vibrations and bumps. It is made above all with playgrounds, sports places and leisure places in mind, where there is a risk of falling from the racks.

The mat is made of a unique, hard-wearing rubber/polyurethane mixture, which has vibration and bump-absorbing properties. The rubber tiles withstands the changes in light and heat outside and tolerates heavy wear.

The safety rubber tile has a modular structure of 50 x 50 cm, which can be placed next to each other to cover even large areas. Despite its thickness, the rubber tile is easy to cut around posts or the like. Strong and thick modules stay well in place.

Falling height:	Height:	Weight:
	mm	1 m ² /kg
0,6 m	20 mm	17,90
0,9 m	30 mm	25,50
1,2 m	40 mm	31,00
1,4 m	50 mm	36,30
1,6 m	60 mm	46,00
1,7 m	70 mm	57,60
1,8 m	80 mm	67,20

Technical data:

Material: rubber/polyurethane
Colors: black, red, grey, green
Size: 50 x 50 cm
